

## **Leviate Jet Management Expands Fleet with Six Honda Jets Plans for Continued Growth in 2025**

*Dallas, Texas – November 21, 2024* – Leviate Jet Management, a division of the Leviate Air Group and a leader in business jet management and charter services, is pleased to announce the addition of six Honda Jet aircraft to its growing fleet. These advanced light jets will operate on a high-utilization charter basis, further enhancing Leviate’s nationwide service capabilities and addressing increasing demand for reliable, efficient private aviation solutions.

This fleet expansion is part of Leviate’s broader growth strategy, which encompasses multiple aircraft categories. The company currently operates a diverse portfolio of business jets, including Citation Xs, Citation XLSs, Challenger 300s, a CJ3+, PC-24, and a Citation M2 Gen2. Leviate plans to continue expanding its core fleet in 2025, to also include additional Honda Jets, enabling the company to continue to meet a wide range of client needs.

“The Honda Jet is one of the most advanced light jets available, combining exceptional efficiency with operational versatility,” said Luis Barros, CEO of Leviate Air Group. “The addition of these aircraft positions Leviate to better serve the growing demand for high-utilization light jet charter operations while offering aircraft owners an optimized program to maximize revenue and operational use.”

The Honda Jets are supported by Leviate’s robust management infrastructure. A dedicated maintenance manager oversees the fleet’s operational efficiency, minimizing downtime and ensuring consistent performance. The aircraft’s charter operations are driven by a specialized sales team focused on revenue optimization and utilization, while a Fleet-Specific Lead Captain and Check-Airman manage pilot training and operational standards to maintain the highest levels of safety and reliability.

“This addition underscores Leviate’s commitment to operational excellence and strategic growth,” said Rob Rosenberg, Managing Partner of Leviate Air Group. “The Honda Jets perfectly complement our existing fleet and represent a significant step in our continued expansion. We are excited to offer enhanced solutions to our clients and look forward to sustained growth in 2025.”

Strategically based in Florida and Texas, the Honda Jets will provide efficient service to key high-demand markets across the United States. With nearly 22 years of incident-free operations, Leviate Jet Management continues to lead the business aviation industry, delivering innovative solutions and maintaining an unwavering focus on safety and reliability.

### **About Leviate Air Group**

Established on a solid foundation of experience and success, Leviate capitalizes on the operational expertise of the three main components of business aviation: Aircraft Charter, Aircraft Sales, and Aircraft Management. Leviate brings together some of the best leaders within the aviation industry to deliver top-level customer service, safety, and support to discerning businesses and private clients. They also offer an array of other services, including maintenance and aviation consulting services. To learn more about Leviate, visit their website at [www.leviateair.com](http://www.leviateair.com).
